

Larry & Elizabeth -

Its not often, these days, that one takes the time (or has the opportunity, alas) to write a Thank you for a service well done.

We had a 40 year old concrete patio of 6 Panels, which had grown tired & settled in different planes like broken spring ice on a river. Water settled against the hood into the well of the basement steps & became home to various field critters who gained access through the cracks.

So we searched, through friends, for a local patio & landscaping firm that would not only replace, but would create an outdoor relaxation area.

We are really pleased with the result. A fine new patio with perimeter landscaping - plus solving all the water problems all done with individual attention in design and installation, and within our budget. We sure will recommend your work to others.

God Bless,

Don & Janet Date
